OVERVIEW

- Market Environment
- Plan Market Values

■ Plan Performance Discussion

CONSIDERATIONS FOR 2023

Persistent High Inflation

- Inflation remains well above nominal interest rates but monetary policy operates with "long and variable lags"
- Federal Reserve expects to continue further restricting monetary conditions

Banking Crisis or Isolated Event?

- Threat of contagion?
- Potential for a 'credit event' outside of the banking industry (e.g., pension funds, insurers, hedge funds, etc.)

Geopolitical Risks Haven't Disappeared

■ US/China tensions, Ukraine war, deglobalization

Outlook

- Stocks may be range-bound in 2023, but risks skew to the downside (e.g., if a banking or liquidity crisis develops)
- Bond market outlook will depend on path of inflation. If inflation remains high, bonds will perform poorly. If there is a risk event, bonds will rally in a flight to safety.
